

## DESCRIPTION

### STRUCTURED MINERAL WATER

**Pure, Structured, Alkaline, Mineral Water** free of radioactive isotopes

- **Purified** - Reverse Osmosis process
- **Structured** - Cell Hydration & Detox
- **Mineralised** - 84 Natural Minerals
- **Alkalinity pH 7.6** - Improved Health

Drinking enough STRUCTURED MINERAL WATER daily for good health - If the label doesn't say STRUCTURED WATER, it is not. Structured mineral water is the cornerstone for healthy living and catalyst for the absorption of vitamins, supplements and food nutrients – the way nature intended.

## USAGE & APPLICATIONS

- **Household and Office Water** for the whole family, including babies – for all your water intake requirements, including cooking and for use with beverages – 6 to 8 glasses /day. (Endorsed by the World Health Organisation)
- **Bulk Water** supplied in safe HDPE containers.
- **Bottled Water** supplied in glass, re-usable HDPE, or PET plastic.
- **Bottle-packs** are cold-wrapped to prevent plastic toxin leaching.

## REFERENCE

Please refer to a testimonial from a nursery school with 300 pre-school kids who have been weaned from drinking sugar-loaded soft drinks and who now only drink our good tasting structured mineral water for the past 2 years ([www.hidroplus.co/aboutus/testimonials](http://www.hidroplus.co/aboutus/testimonials)).

- **Purified** means biological and chemical contaminants removed by reverse osmosis purification, inclusive of hormones, anti-depressants, anti-retroviral drugs (AVR's), pesticides and the like.
- **Structured** means energised water molecules forming micro clusters small enough to penetrate living cells for proper hydration – promoting energy, health, slower aging, skin beauty and weight loss. The negative-charged water ions attract the positive ions of pollutants in your body, de-toxifying you continually.
- **Mineralised** means infused with 84 natural minerals and trace elements, forming electrolyte required for electro-chemical impulses between brain neurons/nerve system and body cells. It therefore improves concentration ability and all body/organ functions. Nutrients, such as vitamins, proteins, enzymes, amino acids, carbohydrates, fats, sugars, oils, etc., require minerals for proper cell utility. In fact, minerals as found in good quality water, play a more important role in our health than vitamins.
- **Alkalinity** means that alkaline water boosts your immune system by neutralising acidity, which is the major cause of cholesterol. Cancer and most diseases thrive in an acidic body. Water pH must be between 7.4 and 7.8 for optimum effect.
- **Radioactive isotope free** means that the surface water radioactive contamination in our water sources that comes from cancer-causing uranium in our deep mines has been removed by means of 'Chernobyl technology'.
